

# Bottle Copies

Dr Clark's recommended source

## INTRODUCTION

We manufacture and supply worldwide a broad range of the highest quality, anatomical, pathological and toxicological specimens as bottled energetic samples. Our collections have been prepared for professional energetic medicine practitioners and their clients, particularly those interested in the therapy of Dr Hulda Clark.

The "Bottle Copies" we produce are amber glass bottles, filled with pure filtered water, that have been electrically charged with the energetic signatures, frequencies or patterns of physical specimens such as: vitamins; herbs; toxins; heavy metals; anatomical or microbiological samples. Almost any physical item can be made into a "Bottle Copy" using techniques similar to those used to make homeopathic medicines. The important point is that these bottles contain no physical specimens. The contents are simply pure filtered water, making them safe to transport and safe to work with in various complementary therapies.

## DR CLARK'S RECOMMENDED SOURCE

Operating since 2001, after the company's founder studied with Dr Hulda Clark at her clinic, we have constantly sought to improve the quality of the master samples we produce, and to expand our range in keeping up to date with her latest research. As a result of this dedication to quality and range of samples, in 2006, Dr Clark published our details as her recommended source for all "Bottle Copies", a role which we are honoured to fulfil. For advice on the storage of "Bottle Copies", how to copy our Master samples, and answers to many frequently asked questions please [CLICK HERE](#).

## VOLUME DISCOUNTS

The following volume discounts are available on all orders of individually selected bottles. Volume discounts do not apply to purchases of "Complete Sets" which already have the maximum 20% discount applied.

The "Bottle Copies" sold on this website contain distilled water only. The water has been subjected to a non-material process, similar to processes used to produce homeopathic remedies, which is believed by some researchers to imprint a subtle energy signature into the water. The presence of this signature cannot be confirmed by chemical or standard testing. No claim is made with regard to the effect of the reputed imprint. These articles are not intended for use in the diagnosis, cure, mitigation, treatment or prevention of disease in man or other animals. Not for oral consumption. ## SPECIAL REQUESTS

### INTRODUCTION

We have created a dedicated category on the site called "**Special Requests**". This category is to allow you to request bottle copy samples that are not listed in our catalogue. This option will be most useful to customers looking for very specific anatomical samples, toxins or pathogens.

Our database of samples includes over 300,000 items, many of which will not be of interest to practitioners of Dr Hulda Clark's therapy. However, to create the possibility of requesting specific or unusual samples from this comprehensive database, we have created this **Special Requests** page.

For bottles that we are able to supply, the price is £7.50 each. Volume discounts do not apply.

### INSTRUCTIONS

Go to the following page: [Special Requests](#)

Please fill in all text fields marked with a \*. Contact details are essential so that we can request more information from you if necessary about the sample you have requested.

When completing the "Sample Descriptions" area, please state the full name of the specimen you are requesting. Please do not use acronyms. We require the full name in order to search our database. For similar reasons, correct spelling is essential. Incorrect spelling may mean we miss a sample in our database that would have been available to you.

If you are unsure of the exact name or spelling, then a brief description of the item may help us search - e.g. an approximate location in the body if you are requesting an anatomical specimen, or if requesting microbiological sample, please tell us whether the item is a bacteria, parasite, mould or virus.

If requesting more than one sample, please insert a line between each item on your list so that there is no confusion.

The process works in two stages:

#### 1. Request information:

The first time you complete this form, please click the "Request info only" button. Your request will then be emailed to us. We will then inform you which samples are available and ask you to return to this page to purchase the samples.

#### 2. Purchasing Samples:

Please complete your details as before, including only the names of the samples we have confirmed are available. Use the +/- quantity box to select the number of samples you are purchasing and then click on the "Add to Cart" button.

The special request items will be added to your standard shopping cart along with any other bottles or kits you have selected. Please then follow our standard checkout process.
